

2025 – Lab Exam 01 Report

Student ID : IT23834606

Batch : 6.1

Description:

Closet is a mobile application designed to simplify the way Sri Lankan fashion lovers shop for clothes. Shoppers often waste time switching between websites, Instagram pages, and physical stores to compare styles, prices, and collections. Closet solves this frustration by bringing all popular Sri Lankan clothing brands into a single platform. The app also offers a personalized shopping experience with smart recommendations based on user preferences and body measurements.

Target audience:

- Teenagers and adults (16–40 years old) who are passionate about fashion
- Online shoppers seeking convenience and comparison tools
- New fashion brands looking to expand their digital presence

Sri Lankan shoppers currently lack a centralized, trustworthy, and personalized fashion app. Closet provides:

- Time-saving by combining all brands in one platform
- Discovery of new arrivals from favorite brands
- Opportunities for emerging clothing stores to register and grow
- AI-powered recommendations to help users find perfect styles and reduce returns

Key Features:

- Unified Store Collection** – View all Sri Lankan fashion brands in one app, including ratings, reviews, and store details (online or physical).
- Brand & Product Filtering** – Easily filter brands and products by user preferences, size, category, and price range.
- AI Designer** – Enter body measurements, height, and preferred colors; receive AI-generated recommendations for clothing that fits and flatters.
- Ratings & Reviews** – View and leave feedback on clothes and brands to make informed choices.
- Save to Favorites** – Users can save clothes or brands they like to their personal collection for easy access later, making it simple to revisit preferred items.

Colors:

The app uses gold and black to create a premium and elegant first impression, emphasizing the logo and key text.

White and off-white are used for the main interface and content areas to provide a clean, minimal, and modern look.

These lighter backgrounds were specifically chosen because clothing items are highly visible on them, making it easy for users to browse, compare, and focus on the products.

The combination balances style, readability, and usability throughout the app.

Onboarding screens

Login screen

The login screen features a dark purple background. At the top center is the 'closet' logo, which consists of a yellow hanger icon above the word 'closet' in a yellow sans-serif font. Below the logo is a white-bordered login form. The form contains three input fields: 'Email' with the placeholder 'abc@gmail.com', 'Password' with masked characters '*****' and an eye icon to toggle visibility, and 'Confirm Password' with a single character placeholder and an eye icon. A yellow 'Sign In' button is positioned below the form. At the bottom, the text 'or continue with' is followed by the Google logo and the text 'Continue with Google'.
